

NeevQA - Outsourced Quality Assurance and Testing Services

Who We Are

NeevQA is the Software Testing practice of Neev Technologies. We are an Outsourced Service Provider for Quality Assurance and Testing Services. NeevQA provides services and solutions in both Functional and non-Functional Testing domains.

NeevQA derives its expertise from its parent - Neev Tech which has delivered over one hundred of Web Projects in the Web2.0 and Rich Internet Applications domain. We work primarily in High Traffic Consumer websites, B2C, B2B e-Commerce applications, Online Market places, Auction Platforms, Complex Rule Engine Applications.

Our Value Proposition

- End-to-end QA partnership in our client's projects
- Reduced Time to Market through highly efficient quality assurance processes
- Increase in Project Execution Efficiency by early defect detection and prevention

What We Do

We provide Outsourced Software Testing services to customers in the Rich Internet / Intranet Applications, B2B, B2C consumer web applications. We act as a Quality bellwether and an end-to-end stake holder in our customer's projects. Our insightful metric driven analysis on product health ensures our customers take fast and right business decisions with the right data.

We provide the following services:

1. Functional Testing Services like Independent Validation and Verification where we undertake product testing with very high bug detection and removal efficiency.
2. Automation framework solutions leveraging the latest in technology to reduce our customer's Regression Time. By use of white box test automation, we also ensure the cost of maintaining automation suites are kept to a minimum.
3. Non-functional and specialist testing services like Performance, Load and Stress Testing. We identify performance bottlenecks in applications ahead of time to give a competitive advantage to our customers in the real web world.
4. Specialist Testing Services like Profiling, Coverage analyses where we complement our customers in adding such competencies at the right time in a product road map.

How We Do It

The expertise that we gained in developing and deploying a number of web applications has enabled NeevQA to draw deep insights on how to make web application projects successful.

By leveraging the latest in Open Source Software and Technology, we ensure our clients have the best and most cost-effective solutions to problems in software quality engineering.

We adopt efficient software quality processes and we improve and industrialize every step in the Software Testing Cycle - Test Planning, Test Asset Generation, Test Management, Test Execution, Defect Data Analysis and Continuous Improvement. The efficiency benefits are then passed on to the customer in terms of reduced cost, improved quality, reduced time to market.

Who Our Customers Are

Our Vision is to help our clients meet their business objectives by leveraging the best and latest in software quality engineering processes. Today's leaders are expected with deliver results fast and without compromising quality. NeevQA aims to become a trusted partner in our clients' quest for Quality.
